

To Whom It May Concern:

As Senior Vice President, Director of Facilities & Network Management for Sun National Bank, there are a lot of demands on me to review leases, plans and facilities issues so my time is limited at best on most days. We have been using Fana Remodeling to replace our roofs and other projects for over four (4) years and this is an area that I know will be done once and correctly.

Marek has been able to meet our needs and demands at each project from the pricing and quality of work performed, this allows me to focus my efforts on other matters and not have to worry and babysit a vendor. Marek and his team of vendors are able to work within the strict security guidelines that we enforce as well as work with the demanding needs of our internal and external stakeholders at each location that works, again leaving me time to focus on other matters and not babysitting a vendor or reestablishing a relationship with a stakeholder.

I would recommend Marek and Fana remodeling for any roofing project and other renovation project that you may have, he will deliver the project on time and on budget.

Very truly yours,

Francisco J. Cotilla, P.E., C.E.M.

Senior Vice President/Director of Facilities & Network Management
